

**CONSTRUCTION NOTICE 17: YORK QUAY REVITALIZATION UNDERGROUND GARAGE**

Please note that on Friday, October 7 we have another slab pour scheduled to commence in the morning. Unfortunately as part of the pour operation the slab needs to be cut as soon as possible following setting of the concrete to minimize cracking as per code requirements. This operation is expected to commence in the early evening hours but will last for a few hours before the entire slab has been cut. This operation will cause noise as the cutting is done with a gas powered machine. This is the third of four major pours that will require this work to be done, and there is one other small pour that can hopefully be completed within regular working hours. The last remaining major pour will occur within the next couple of weeks and we will advise a few days prior to that date.

We do understand that this activity will be a cause of concern for some residents and regret that there is no way around completing this work within normal working hours. We will ensure that every effort is made to minimize the amount of time required to complete this work. We do wish to apologize for any inconvenience this may cause.

For more information about the project, please visit [www.waterfrontoronto.ca](http://www.waterfrontoronto.ca) or [www.harbourfrontcentre.ca](http://www.harbourfrontcentre.ca).

Please contact me if you should have any questions or concerns.
