**Subject:** CONSTRUCTION NOTICE 21: YORK QUAY REVITALIZATION UNDERGROUND GARAGE

**CONSTRUCTION NOTICE 21: YORK QUAY REVITALIZATION UNDERGROUND GARAGE**

On Sunday, November 6 EllisDon is providing access to another contractor to facilitate the replacement of the cooling tower for the residences on 211 Queens Quay West. The work is scheduled to commence at 7:00 am and be complete by about 3:00 pm. These activities involve the mobilization and assembly of a large crane to perform a few lifts and then disassembly of the crane. This operation is not expected to result in any significant noise or disruption to the neighborhood. The work has been scheduled in this way due to limited access to 211 Queens Quay West with the construction underway at 225 Queens Quay West.

We do understand that this activity may concern some residents and apologize for that inconvenience.

Please advise your residents and tenants about this planned activity AS APPROPRIATE. For more information about the project, please visit [www.waterfrontoronto.ca](http://www.waterfrontoronto.ca) or [www.harbourfrontcentre.ca](http://www.harbourfrontcentre.ca).

Please contact me if you should have any questions or concerns.

Regards,  
Gali Nayot
